(54) Title: A REMOTE CONTROL SYSTEM OF A HOME NETWORK

(57) **Abstract:** A remote control system of a home network includes a local home network to which plural devices are connected; a remote terminal for controlling the local home network from a remote place; and a remote access server having a function of a local control point and transferring and receiving request/response to and from the remote terminal. States of equipments connected to the home network can be monitored and controlled by using various terminals.
